

CONTENTS

No. 1. JANUARY 1930

	PAGE
F. B. HUTT, A Note on the Effects of Different Doses of Thyroid on the Fowl	I
JOSEPH NEEDHAM AND DOROTHY MOYLE NEEDHAM, Nitrogen-excretion in Selachian Ontogeny	7
KATHLEEN GODWIN PINHEY, Tyrosinase in Crustacean Blood	19
J. BĚLEHRÁDEK AND J. S. HUXLEY, The Rate of Eye-growth and its Variation in <i>Gammarus chevreuxi</i>	37
G. S. CARTER, Thyroxine and the Oxygen Consumption of the Spermatozoa of <i>Echinus miliaris</i>	41
E. A. SPAUL, On the Activity of the Anterior Lobe Pituitary	49
J. ARMITAGE ROBERTSON, On Rate of Movement in a Flat-worm as influenced by Body-level, Duration of Captivity, and Regeneration	88

No. 2. APRIL 1930

G. L. CLARKE, Change of Phototropic and Geotropic signs in <i>Daphnia</i> induced by Changes of Light Intensity	109
HUGH H. DARBY, The Experimental Production of Life Cycles in Ciliates	132
E. R. PARPART AND OTTO GLASER, Temperature and Heart Rate in Chick Embryos	143
E. A. SPAUL AND N. H. HOWES, The Distribution of Biological Activity in the Anterior Pituitary of the Ox	154
M. A. TAZELAAR, The Relative Growth of Parts in <i>Palaemon carcinus</i>	165
J. HAMMOND, The Effect of Temperature on the Survival <i>in vitro</i> of Rabbit Spermatozoa obtained from the Vagina	175
J. C. MOTTRAM, The Production of Non-Disjunction by γ -Radiation from Radium	196
MUR WALTON, The Effect of Temperature on the Survival <i>in vitro</i> of Rabbit Spermatozoa obtained from the <i>vas deferens</i>	201
