CONTENTS

1. A Short Investigation into the Habits, Abundance, and Species of Seals on the North Cornwall Coast. By O. A. STEVEN. With Charts I—III.

3. Rissoid Larvae as Food of the Young Herring. The Eggs and Larvae of the Plymouth Rissoidae. By MARIE V. LEBOUR. With Plates I—IV.

4. The Eggs and Larvae of some British Turridae. By MARIE V. LEBOUR. With Plates I—IV.

5. On the Occurrence of the Siphonophores Muggiaea atlantica Cunningham and Muggiaea kochi (Will) in the English Channel. By F. S. RUSSELL.

11. On the Relationship of the Substratum to the Metamorphosis of Scolecolepis fuliginosa (Claparède). By J. H. DAY and DOUGLAS P. WILSON.

12. The Habitat of Procerodes silvae. By A. D. RITCHIE.

13. Two Parasites of the Common Cockle, Cardium edule, a Rhabdocoele Paravortex cardii Halles and a Copepod, Paranthessius rostratus (Canu). By D. ATKINS.

15. Studies on Syloneutes sterki sp. nov. I. Morphology and Systematic Position. By LAURA GARNJOBST. With Plates I and II and 1 Text Figure.

17. The use of a Selenium Rectifier Photo-electric Cell for Submarine Photometry. By H. H. POOLE and W. E. G. ATKINS. With 1 Figure in the Text.

19. The Variation of Excess Base with Depth in the English Channel with reference to the Seasonal Consumption of Calcium by Plankton. By L. H. N. COOPER.

20. The Determination of Phosphorus and Nitrogen in Plankton. By L. H. N. COOPER.

28. A Comparative Study of Metridium senile (L.) var. dianthus (Ellis) and a Dwarf Variety of this Species occurring in the River Mersey, with a Discussion on the Systematic Position of the Genus Metridium. By RUTH RAWUNSON. With 5 Figures in the Text.

29. The Flow of Water Past the Seven Stones Lighthouse. By J. N. CARRUTHERS.

Contributors can avoid delay in the publication of their work by conforming with the following arrangements:

The Journal of Experimental Biology will publish contributions in experimental biology and comparative physiology, whether zoological or botanical. Every paper must contain a summary of the chief results of the enquiry. Authors are requested to present their work in as concise a form as possible. They will receive 50 copies of their papers free; additional copies, not exceeding 100 (except in special cases), may be purchased and should be ordered when the proofs are returned to the Editor.

All communications other than American manuscripts should be addressed to the Editor,

J. Gray, King's College, Cambridge, England

American manuscripts may be sent to

Dr E. Ponder, Biological Laboratory, Cold Spring Harbor,
Long Island, N.Y.

MANUSCRIPTS:
MSS. should be typewritten on one side only of the paper, and the pages should be numbered. All paragraphs to be printed in small type should be indicated by adding a line at the side of the copy. Tables and Legends should be on separate sheets from the rest of the MS. and should be numbered. The place where they are to be inserted in the text should be indicated in the margin of the MS. Bibliography should be given under the heading of "References" and in the following form: Surname of authors (in alphabetical order), initials, date of publication, title of journal, volume and page of reference. In the text a reference should be quoted by the author's name and date (in brackets), and not by the numerical order of the paper in the list of references. All names of journals and books will be printed in italics.

ILLUSTRATIONS:
(i) Plates. Drawings should be executed on white drawing paper or card (yellowish backgrounds should be avoided), and gummed on white card grouped and numbered in the order in which they are to appear in the published plate. Exclusive of margin the plate-figures should not cover, when reduced, an area greater than 7½ ins. length x 5 ins. in width when ready for reproduction as a single plate or 7½ ins. x 1⅛ ins. in the case of double plates. All lettering should be put in faintly with pencil. For the reproduction of photographs by the half-tone process a good glossy bromide print is required. All lettering to appear on photographs should be shown in position on a covering sheet of transparent paper. If a part only of the photograph is required it should be indicated in the same way.

(ii) Line blocks should be used whenever possible. Illustrations should be pen drawings in Indian ink (jet black and water-proof) on smooth white Bristol board, the lettering being temporarily and lightly put in by the author with a soft pencil. It is best for the author to allow the skilled draughtsman or type-setter to deal with the final lettering. The size of the lettering inserted into the original drawing should be graded according to the degree of reduction that is desired in the final reproduction. All brush work, tinting, or pencil shading is to be avoided. Where considerable reduction is required, it is essential that the drawing should be of such a character as to bear such reduction.

Charts and Curves are frequently drawn in best advantage on graph paper ruled in pale blue since, whilst ensuring accuracy, the blue lines do not appear in the photograph, only the blackened lines that are desired remaining.

PROOFSHEETS:
Authors will receive one set of slip proof for correction and return to the Editor. A page proof will also be sent if the slip proof is marked by the author 'Revise.' An allowance of ten shillings per sheet of sixteen pages will be made for alterations apart from printer's errors. Authors will be charged for any excess over this average.

THE SOCIETY FOR EXPERIMENTAL BIOLOGY
The Society exists for the promotion of experimental biology. It holds Conferences, generally three times a year, at which the results of experimental investigations are presented and discussed. The Journal of Experimental Biology is the medium of publication of the Society. Enquiries about membership of the Society should be addressed to the Secretaries:

W. H. Pearsall, Department of Botany, The University, Leeds
G. P. Wells, Department of Zoology, University College, London, W.C. 1

PRINTED IN GREAT BRITAIN BY WALTER LEWIS, M.A., AT THE UNIVERSITY PRESS, CAMBRIDGE
