

The Journal of Experimental Biology

EDITED BY

J. E. TREHERNE

WITH W. A. FOSTER & P. K. SCHOFIELD

	PAGE
WEEKS, JANIS C. AND TRUMAN, JAMES W. Hormonally mediated reprogramming of muscles and motoneurons during the larval-pupal transformation of the tobacco hornworm, <i>Manduca sexta</i>	1
NGUYEN PHU, D., YAMAGUCHI, K., SCHEID, P. AND PIPER, J. Kinetics of oxygen uptake and release by red blood cells of chicken and duck	15
BERTRAM, J. E. A. AND GOSLINE, J. M. Fracture toughness design in horse hoof keratin	29
BEASON, ROBERT C. AND BRENNAN, WILLIAM J. Natural and induced magnetization in the bobolink, <i>Dolichonyx oryzivorus</i> (Aves: Icteridae).	49
MIZUNAMI, MAKOTO AND TATEDA, HIDEKI. Classification of ocellar interneurons in the cockroach brain.	57
HAYASHI, YUTAKA AND MOTOKAWA, TATSUO. Effects of ionic environment on viscosity of catch connective tissue in holothurian body wall	71
BUTT, A. G. AND TAYLOR, H. H. Salt and water balance in the spider, <i>Porrhothele antipodiana</i> (Mygalomorpha: Dipluridae): effects of feeding upon hydrated animals	85
TANG, TWEN POH AND MACMILLAN, DAVID L. The effects of sensory manipulation upon interlimb coordination during fast walking in the cockroach	107
HOHTOLA, ESA AND STEVENS, E. DON. The relationship of muscle electrical activity, tremor and heat production to shivering thermogenesis in Japanese quail	119
VITALIS, TIMOTHY Z. AND MILSOM, WILLIAM K. Pulmonary mechanics and the work of breathing in the semi-aquatic turtle, <i>Pseudemys scripta</i>	137
VITALIS, TIMOTHY Z. AND MILSOM, WILLIAM K. Mechanical analysis of spontaneous breathing in the semi-aquatic turtle, <i>Pseudemys scripta</i>	157
KORMANIK, GREGG A. AND EVANS, DAVID H. The acid-base status of prenatal pups of the dogfish, <i>Squalus acanthias</i> , in the uterine environment	173
MOYES, CHRISTOPHER D., MOON, THOMAS W. AND BALLANTYNE, JAMES S. Osmotic effects on amino acid oxidation in skate liver mitochondria	181
SAND, OLAV AND KARLSEN, HANS E. Detection of infrasound by the Atlantic cod'	197
CALABRESE, RONALD L. AND MARANTO, ANTHONY R. Cholinergic action on the heart of the leech, <i>Hirudo medicinalis</i>	205
WHEATLY, MICHÈLE G., MCMAHON, BRIAN R., BURGGREN, WARREN W. AND PINDER, ALAN W. Haemolymph acid-base, electrolyte and gas status during sustained voluntary activity in the land hermit crab (<i>Coenobita compressus</i>)	225

Continued on back cover

ILLUSTRATIONS should be assigned figure numbers. Photographs should only be used where essential, for example for electron micrographs. Wherever possible, oscillographs should be made suitable for reproduction as line drawings. The cost of colour plates must be defrayed by the author.

Line drawings must be no more than twice final size. Maximum final size is 200×130 mm. Pen drawings should be in black Indian ink on unfolded heavy white paper or good quality tracing paper. Oscillographs should have a white background. *Lettering* will be inserted by the printers and should be indicated on the duplicate copies.

Photographs should be at final size. Maximum final size is 200×130 mm for a single plate, and 200×290 mm for a double plate. Photographs should be glossy bromide prints with good definition. They should be gummed on to white card and grouped as they are to appear. *Numbering* and *lettering* will be inserted by the printers and should be indicated on a tracing paper overlay. Magnification should be indicated, when relevant, by a scale line drawn on the overlay or beside the illustration.

SHORT COMMUNICATIONS must be original contributions to the literature and not preliminary reports. Methodological papers will only be accepted as *Short Communications*. All above instructions apply except that the communications must not exceed four published pages in length (including illustrations), no *Summary* is required, and line drawings must be at final size.

WORD-PROCESSOR DISKS. JEB can now use author's *word-processor disks* for setting accepted articles. If available, please send a copy of the disk plus details of the word processor and program used with your manuscript after final revision. Disks will be returned after use.

PROOFSHEETS AND OFFPRINTS. Authors will receive one set of slip proofs for correction and return to the Editor. A page proof will also be sent if the slip proof is marked by the author 'Revise'. An allowance of 50p per sheet of sixteen pages will be made for alteration errors not made by the printers: any excess may be charged to the author. Authors will receive 200 complimentary copies of their papers: additional copies may be purchased at modest cost, and should be ordered when the proofs are returned to the Editor.

The Company of Biologists Limited is a non-profit-making organization whose directors are active professional biologists. The Company, which was founded in 1925, is the owner of this journal and the Journal of Cell Science and Journal of Embryology and Experimental Morphology.

Copyright and Reproduction. Authors may make copies of their own papers in this journal without seeking permission from The Company of Biologists Limited, *provided that such copies are for free distribution only: they must not be sold.*

Authors may re-use their own illustrations in other publications appearing under their own name, without seeking permission.

Specific permission will *not* be required for photocopying copyright material in the following circumstances:

1. For private study, provided the copying is done by the person requiring its use, or by an employee of the institution to which he/she belongs, without charge beyond the actual cost of copying.
2. For the production of multiple copies of such material, to be used for *bona fide* educational purposes, provided this is done by a member of the staff of the university, school or other comparable institution, for distribution without profit to student members of that institution provided the copy is made from the original journal.

For all other matters relating to the reproduction of copyright material written application must be made to Dr R. J. Skaer, Company Secretary, The Company of Biologists Limited, Department of Zoology, Downing Street, Cambridge CB2 3EJ, UK.

ISI Tear Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA is authorized to supply single copies of separate articles for private use only.

Subscriptions. *The Journal of Experimental Biology* (ISSN 0022-0949) is published as seven volumes a year in January, March, May, July, September, October and November. The subscription price of volumes 120-126 (1986) is £140.00 UK (USA and Canada US \$370.00, Japan £158.00) per annum, payable in advance; postage is included. Individual volumes may be purchased at £25.00 (USA and Canada US \$62.00) each, plus postage. Orders for 1986, which must be accompanied by payment, may be sent to any bookseller or subscription agent or direct to The Biochemical Society Book Depot, P.O. Box 32, Commerce Way, Colchester CO2 8HP, UK. Copies of the journal for subscribers in the USA and Canada are sent by air to New York to arrive with minimum delay. Second class postage paid at New York, NY and at additional mailing offices.

POSTMASTER, send address corrections to: The Journal of Experimental Biology, c/o Mercury Airfreight International Inc., 10B Englehard Avenue, Avenel, New Jersey 07001, USA (US Mailing Agent).

Claims for missing parts can only be considered if made immediately upon receipt of the subsequent issue.

Back Volumes. Please contact The Biochemical Society Book Depot (see above) for prices.

Index. An annual index will appear in the last volume each year.
