Information for contributors

Style
Papers should be as concise as possible, be written in English (spelling as in Oxford English Dictionary), and use SI units.

Submissions
Please enclose two copies of the text, one set of original illustrations and two sets of copy figures.

Text (including tables, references and figure legends)
The text must be typewritten, in double-spacing, with numbered pages. The position of the figures and tables should be indicated in the margin. The title page must include the address(es) where the work was carried out, a page heading of up to 40 characters, and three or more key words. Where applicable, the present address and address for correspondence should also be given. A Summary must be the first section of the ms, stating as briefly as possible (typically 150–200 words) the results and conclusions of the work. Each table must be on a separate page. Figure legends must be in a single series at the end of the ms. References must be listed alphabetically. The titles of journals should be abbreviated according to the World List of Scientific Periodicals, 4th edn (1963), and should be presented as follows:

Citations in the text are given in the following form: Jones & Smith (1960) or (Jones & Smith, 1960). Where there are more than two authors citations should be in the form (Jones et al. 1960). Where more than one paper by the same author(s) has been published in the same year they are cited as Jones (1960 a), Jones (1960 b) etc.

Illustrations
All line drawings and photographs should be unlabelled, with the author’s name and the number of the figure written on the back. The figures should be numbered in the order in which they appear in the text. Authors should also submit two full sets of clearly labelled copies of illustrations.

Line drawings must be no more than twice final size. Maximum final size is 200×130 mm. Oscillographs should be made suitable for reproduction in the form of well-defined line drawings and should have a white background.

Do submit original line drawings on heavy white paper or as well-defined photographic copies.

Do not submit originals in the form of computer printouts, photocopies or drawings on tracing or graph paper.

Do not use fine stippling or shading.

Photographs should be at final size. Maximum final size is 200×130 mm for a single plate. Photographs should be glossy bromide prints with good definition. They should be gummed on to white card and grouped as they are to appear. Numbering and lettering will be inserted by the printers and should be indicated on a tracing paper overlay. Magnification should be indicated, when relevant, by a scale line drawn on the overlay or beside the illustration. Colour plates can be reproduced free of charge at the Editor’s discretion.

Short communications
Must be original contributions to the literature and not preliminary reports. Methodological papers will only be accepted as Short Communications. All above instructions apply except that the communications must not exceed four published pages in length (including illustrations), no Summary is required, and line drawings must be at final size.

Proofsheets and offprints
Authors will receive one set of slip proofs for correction and return to the Editor. Authors will receive 200 complimentary copies of their papers: additional copies may be purchased at modest cost, and should be ordered when the proofs are returned to the Editor.
Word-processor disks

If your manuscript was prepared on a word processor there is a high probability that we can use the floppy disk for typesetting. This gives us a substantial decrease in typesetting time and assures you that there are no re-keying errors in your article. Using word-processor disks helps us to shorten publication times. Disks need not be sent when the manuscript is first submitted. Disks are not needed for Short Communications.

If you use a word processor and would be willing to lend us the disk, please give whoever is preparing your manuscript the following instructions, so that we can make the best use of your disk.

1 Follow the general instructions about style given in the Information for Contributors in the Journal.

2 When you create and/or edit your manuscript, please use the document mode (or equivalent) in the word-processor program.

3 Where possible, please.
   Do not split the article into small files on the disk; if possible keep all of the article in one file.
   Do not put more than one article in a file: it is difficult to separate the articles.
   Do not give the file a name which is longer than 8 characters.
   Do not justify the right-hand margin; this often produces ‘discretionary’ or ‘soft’ hyphens, which are not required.
   Do not use footnotes.
   Do use paragraph indents.
   If possible use your word-processor facilities: underlining, bold, superscripts and subscripts where required.
   If possible distinguish the numerals zero and one from the letters O and I.
   Do leave a blank line before and after all headings.
   Do type main headings in capital letters (e.g. RESULTS).
   Do type subheadings with underlining (e.g. underline).

4 If your word processor or printer has any special characters, e.g.

   å û à é ø å õ ç ê û ± ° C × α δ Δ

   please use them consistently throughout the text. Please make a list of such special characters used and how you obtain them (i.e. dedicated key pressed or printer control codes used directly), and send this to us with the disk.

5 If you have customized or installed your word processor using non-standard control codes, please indicate on the disk and, if possible, list any changes you have made. Alternatively, if you cannot supply a standard version of the word processor, please supply a ‘text only’/ASCII file.

6 Please ensure that the disk sent to us is the final corrected version of the article that exactly matches the final manuscript.

7 Send us two complete final corrected versions of the manuscript, as well as the disk. NB: send only the disk containing the manuscript, not the word-processor program.

8 Label the disk with: (a) your name; (b) the word processor/computer used, e.g. Osborne 1; (c) the printer used, e.g. Laserwriter; (d) the name of the program, e.g. Wordstar.

The disk will be returned to you.
