Iwama and Heisler on acid–base regulation as a function of water salinity 1
Thollesson and Norberg on moments of inertia of bat wings 19
Syed and Winlow on coordinating interneurones in Lymnaea stagnalis 37
Ferguson and Benjamin on the motor control of snail withdrawal 63
Ferguson and Benjamin on the sensory activation of snail withdrawal 97
Francis on sailing downwind 117
Anderson, Feder and Full on the energetics of a gait change 133
Lönnendonker on dynamic fixation behaviour 149
Wenning, Greisinger and Proux on urine formation in a centipede 165
Axelsson and Frischa on gastrointestinal blood flow in the cod 181
Reid, Moon and Perry on trout erythrocyte β-adrenoreceptors 199
Reid and Perry on cortisol and trout erythrocyte β-adrenoreceptors 217
Chapman, Ascoli-Christensen and White on sensory coding in a grasshopper 241
Moon, Altringham and Johnston on muscle energetics and power output 261
Gibbons and Shadwick on the mechanics of the toad aorta 275
Gibbons and Shadwick on haemodynamics in the toad 291
Lakes-Harlan, Bailey and Schikorski on the auditory system of a bushcricket 307
May on dragonfly flight 325
Curtin and Woledge on the efficiency of dogfish muscle fibres 343
Culik and Wilson on swimming in instrumented penguins 355
Full, Blickhan and Ting on leg design in hexapedal runners 369
Stumpner and Ronacher on the auditory interneurones of a grasshopper 391
Stumpner, Ronacher and von Helversen on the neuronal processing of the grasshopper song 411
van der Velden, Spanings, Flik and Wendelaar Bonga on the magnesium-dependence of carp embryos 431
Butt and Taylor on spider coxal organs 439
Weber on lactate kinetics in swimming trout 463
Ahearn and Behnke on proline transport in starfish 477
Ahearn and Franco on Na⁺/H⁺ exchange in echinoderm epithelium 495
Colquhoun, Holden-Dye and Walker on Ascaris cholinoreceptors 509
Flügel and Lütjen-Drecoll on carbonic anhydrase in the dogfish uterus 531
Shelton and Jones on the alligator cardiac cycle 539
Cromarty, Cobb and Kass-Simon on lobster escape behaviour 565
Featherstone, Drewes and Coats on the startle response of medaka 583
Ellington on phosphagens in echinoderm muscle 591
Skorupski and Hustert on monosynaptic locust leg reflexes 599
