THE QUARTERLY JOURNAL OF
MICROSCOPICAL SCIENCE
With the Co-operation of D. M. S. WATSON, M.Sc., F.R.S.,
C. M. YONGE, D.Sc., F.R.S., G. P. BIDDER, Sc.D.

CONTENTS—New Series
No. 347. Volume 87, Part III, September 1946. 21s. net

F. K. SANDERS. Cytochemical Differentiation between the Pentose and Desoxypentose
Nucleic Acids in Tissue Sections. (With Plate 7.)

(With 11 Text-figures.)

L. S. RAMASWAMI. The Chondrocranium of Calotes versicolor (Daud.) with a Description
of the Osteocranium of a just-hatched Young. (With 16 Text-figures.)

CHI-LAN TSUI and TSING-HWA PAN. The Development of the Olfactory Organ of
Kaloula borealis (Barbour) as compared with that of Rana nigromaculata Hallowell.
(With 7 Text-figures.)

Subscription for a Volume of four numbers, post free on issue, £3. 3s. 0d. net

THE JOURNAL OF PHYSIOLOGY
Vol. 105, No. 3 CONTENTS December 1946

J. H. LAWRENCE, W. F. LOOMIS, C. A. TOBIAS AND F. H. TURPIN. Preliminary observations on
the narcotic effect of xenon with a review of values for solubilities of gases in water and oils.

MARGERY CUTTING AND R. A. McCANCE. The metabolism of kidney slices from new-born and
mature animals.

F. W. SHARPLEY. Relations between illumination and extent of the visual field.

E. M. VAUGHAN WILLIAMS. Urea excretion by rabbits.

R. K. CARPENTER, L. D. MACLEOD AND M. REISS. The effect of adreno-corticotrophic hormone
on the respiratory metabolism of the adrenal cortex of the rat.

G. POPIJÁK. Maternal and foetal tissue- and plasma-lipids in normal and cholesterol-fed rabbits.

W. J. ALLEN, H. BARCROFT AND O. G. EDHOLM. On the action of adrenaline on the blood
vessels in human skeletal muscle.

O. A. TROWELL. The experimental production of watery vacuolation of the liver.

PROCEEDINGS OF THE PHYSIOLOGICAL SOCIETY, 28 September 1946.

CAMBRIDGE UNIVERSITY PRESS
BENTLEY HOUSE, 200 EUSTON ROAD, LONDON, N.W.1
Contributors can avoid delay in the publication of their work by conforming with the following arrangements:

The Journal of Experimental Biology will publish contributions in experimental biology and comparative physiology, whether zoological or botanical. Every paper must contain a summary of the chief results of the enquiry. Authors are requested to present their work in as concise a form as possible. They will receive 50 copies of their papers free; additional copies, not exceeding 100 (except in special cases), may be purchased and should be ordered when the proofs are returned to the Editor.

All communications should be addressed to the Editor,

Prof. J. Gray, Zoological Department, University of Cambridge, England

**MANUSCRIPTS:**

MSS. should be typewritten on one side only of the paper, and the pages should be numbered. All paragraphs to be printed in small type should be indicated by adding a line at the side of the copy. Tables and Legends should be on separate sheets from the rest of the MS. and should be numbered. The place where they are to be inserted in the text should be indicated in the margin of the MS. Bibliography should be given under the heading of “References” and in the following form: Surname of authors (in alphabetical order), initials, date of publication, title of journal (abbreviated according to the World List of Scientific Periodicals), volume and page of reference. In the text a reference should be quoted by the author’s name and date (in brackets), and not by the numerical order of the paper in the list of references. All names of journals and books will be printed in italics.

**ILLUSTRATIONS:**

(i) **Plates.** Drawings should be executed on white drawing paper or card (yellowish backgrounds should be avoided), and gummed on white card grouped and numbered in the order in which they are to appear in the published plate. Exclusive of margin the plate-figures should not cover, when reduced, an area greater than 7½ ins. in length x 5 ins. in width when ready for reproduction as a single plate or 7½ ins. x 11½ ins. in the case of double plates. All lettering should be put in faintly with pencil. For the reproduction of photographs by the half-tone process a good glossy bromide print is required. All lettering to appear on photographs should be shown in position on a covering sheet of transparent paper. If a part only of the photograph is required it should be indicated in the same way.

(ii) **Line blocks** should be used whenever possible. Illustrations should be pen drawings in Indian ink (jet black and water-proof) on smooth white Bristol board, the lettering being temporarily and lightly put in by the author with a soft pencil. It is best for the author to allow the skilled draughtsman or typesetter to deal with the final lettering. The size of the lettering inserted into the original drawing should be graded according to the degree of reduction that is desired in the final reproduction. All brush work, tinting, or pencil shading is to be avoided. Where considerable reduction is required, it is essential that the drawing should be of such a character as to bear such reduction. Charts and curves are frequently drawn to best advantage on graph paper ruled in pale blue since, whilst ensuring accuracy, the blue lines do not appear in the photograph, only the blackened lines that are desired remaining.

**PROOFSHEETS:**

Authors will receive one set of slip proof for correction and return to the Editor. A page proof will also be sent if the slip proof is marked by the author ‘Revise.’ An allowance of ten shillings per sheet of sixteen pages will be made for alterations apart from printer’s errors. Authors will be charged for any excess over this average.

---

**THE SOCIETY FOR EXPERIMENTAL BIOLOGY**

The Society exists for the promotion of experimental biology. It holds Conferences, generally three times a year, at which the results of experimental investigations are presented and discussed. The Journal of Experimental Biology is the medium of publication of the Society. Enquiries about membership of the Society should be addressed to the Secretaries:

Dr J. F. Danielli, The Chester Beatty Research Institute, Fulham Road, London, S.W. 3

Dr R. Brown, Department of Botany, Leeds

PRINTED IN GREAT BRITAIN AT THE UNIVERSITY PRESS, CAMBRIDGE.
(BROOKE CRUTCHLEY, UNIVERSITY PRINTER)
