The Journal of Experimental Biology

EDITED BY
J. GRAY

ASSISTED BY
The Hon. Secs. Society for Experimental Biology

Contents

C. A. G. Wiersma and Ernest B. Wright. The nature of the action potentials of crustacean muscles. (With Plates 7 and 8) ........................................... 205

J. W. L. Beament. The formation and structure of the micropylar complex in the egg-shell of Rhodnius Prolixus Stahl. (Heteroptera reduviidae). (With Fifteen Text-figures) ........................................... 213

W. H. Thorpe, A. C. Crombie, R. Hill and J. H. Darrah. The behaviour of wireworms in response to chemical stimulation. (With Plate 9 and Eleven Text-figures) ........................................... 234

Lord Rothschild. Spontaneous rhythmical impedance changes in the egg of the trout. II. (With Five Text-figures) ........................................... 267

Ernest Baldwin and Vivien Moyle. An isolated nerve-muscle preparation from Ascaris lumbricoides. (With Five Text-figures) ........................................... 277

Ivor Cornman. The responses of onion and lily mitosis to coumarin and parasorbic acid. (With Plate 10) ........................................... 292

J. R. Eriksen Jones. The oxygen consumption of Gasterosteus aculeatus L. in toxic solutions. (With Ten Text-figures) ........................................... 298

Patricia Allen, F. W. Rogers Brambell and Ivor H. Mills. Studies on sterility and prenatal mortality in wild rabbits. I. The reliability of estimates of prenatal mortality based on counts of corpora lutea, implantation sites and embryos. (With Four Text-figures) ........................................... 312

F. W. Rogers Brambell and Ivor H. Mills. Studies on sterility and prenatal mortality in wild rabbits. II. The occurrence of fibrin in the yolk-sac contents of embryos during and immediately after implantation. (With Plate 11) ........................................... 332

A. T. Phillipson. The production of fatty acids in the alimentary tract of the dog ........................................... 346

Eric Ponder. Disk-sphere transformations produced by lysins, and their reversal, in systems of different pH ................................. 350

Sydney Smith. Studies in the development of the rainbow trout (Salmo irideus). I. The heat production and nitrogenous excretion. (With Five Text-figures) ........................................... 357

A. D. Lees. Transpiration and the structure of the epicuticle in ticks. (With Thirteen Text-figures) ........................................... 379

Index ........................................... 411
