## INDEX OF SUBJECTS

A

**Amphibian:**
See Organizer tissue

**Anodonta cygnea:**
See Lamellibranchs

**Antennal movement:**
See Daphnia

**Balanus balanoides:**
Laboratory experiments on gregariousness during setting in, and other barnacles (KNIGHT-JONES) 584

**Barnacles:**
See Balanus balanoides

**Behaviour:**
The gregarious, of marching Locusta migratoria migratorioides (R. & F.) hoppers (ELLIS) 214
— See also Mice

**Birds:**
The flight of. II. Wing function in relation to flight speed (BROWN) 90

**Black snake:**
Metabolism of the, embryo. I. Nitrogen excretion (CLARK) 492
— II. Respiratory exchange (CLARK) 502

**Blood groups:**
The occurrence of, in cats (HOLMES) 330

**Brain metabolite concentration:**
Central nervous function and changes in. III. Glycogen in the normal behaviour of mice (CHANCE) 468

**Bull:**
See Spermatozoa

**Caddis larvae:**
The influence of dissolved oxygen on the respiratory movements of (FOX and SIDNEY) 235

**Cambarus clarkii:**
Physiological and pharmacological observations on muscle receptor organs of the crayfish (WIRISMA, FURSHAN and FLORBY) 136

**Cats:**
The occurrence of blood groups in (HOLMES) 350

**Cecropia silkworm:**
The moulting fluid of (PASSONNEAU and WILLIAMS) 545

Central nervous function:
and changes in brain metabolite concentration. III. Glycogen in the normal behaviour of mice (CHANCE) 468

Central nervous system:
and regeneration in Crustaces (NEEDHAM) 151

Cleavage:
See Sea-urchin eggs

**Colchicine:**
See Sea-urchin eggs

Dorsal nerve cord:
See Crustacean muscle fibres

**Dorsal nerve cord:**
See Crustacean muscle fibres

**Drosophila melanogaster:**
Oxygen consumption and cell size. A comparison of the rate of oxygen consumption of diploid and triploid prepupae of (ELLNBRY) 475

**Egg:**
The influence of temperature and moisture on the uptake and loss of water in the, of Gryllus commodes Walker (Orthoptera-Gryllidae) (BROWNING) 104

**Excretion:**
See Black snake

**Fertilization reaction:**
See Sea-urchin

**Coelenterates:**
Studies on the mesogloea of. II. Physical properties (CHAPMAN) 440

**Colchicine:**
See Sea-urchin eggs

**Cornes:**
Polarized light studies of the. I. The isolated cornea (STANWORTH and NAYLOR) 160
— II. The effect of intra-ocular pressure (STANWORTH) 164

**Crayfish:**
See Cambarus clarkii

**Crustacea:**
The central nervous system and regeneration in (NEEDHAM) 151
— See also Isopod crustacean

**Crustacean muscle fibres:**
Distributed 'end-plate potentials' of (FATT and KATZ) 433

**Cleavage:**
See Sea-urchin eggs

**Colchicine:**
See Sea-urchin eggs

**Cornes:**
Polarized light studies of the. I. The isolated cornea (STANWORTH and NAYLOR) 160
— II. The effect of intra-ocular pressure (STANWORTH) 164

**Crayfish:**
See Cambarus clarkii

**Crustacea:**
The central nervous system and regeneration in (NEEDHAM) 151
— See also Isopod crustacean

**Crustacean muscle fibres:**
Distributed 'end-plate potentials' of (FATT and KATZ) 433

**Dorsal nerve cord:**
See Crustacean muscle fibres

**Drosophila melanogaster:**
Oxygen consumption and cell size. A comparison of the rate of oxygen consumption of diploid and triploid prepupae of (ELLNBRY) 475

**Egg:**
The influence of temperature and moisture on the uptake and loss of water in the, of Gryllus commodes Walker (Orthoptera-Gryllidae) (BROWNING) 104

— See also Daphnia and Sea-urchin egg(s)

**Electric organ:**
See Torpedo

**Embryo:**
See Black snake

**End-plate potentials:**
See Crustacean muscle fibres

**Excretion:**
See Black snake

**Fertilization reaction:**
See Sea-urchin
Index of Subjects

Flight of birds:
  II. Wing function in relation to flight speed (Brown) 90

Flight muscles:
  See Orthoptera

Glycogen:
  See Mice

Gregariousness:
  Laboratory experiments on, during setting in Balanus balanoides and other barnacles (Knight-Jones) 584
  — See also Behaviour

Gryllulus commodus:
  See Eggs

Homing pigeons:
  See Pigeons

Human red cell ghost:
  A polarized light analysis of the (Mitchison) 397

Insects:
  Active transport of potassium by the Malpighian tubules of (Ramsay) 358
  — See also Potassium ions

Ionic regulation:
  Further studies on, in marine invertebrates (Robertson) 277
  — See also Osmotic and ionic regulation

Isopod crustacean:
  Osmotic and ionic regulation in the, Ligia oceanica (Parry) 567

Lamellibranchs:
  Osmotic relations in molluscan contractile tissues. I. Isolated ventricle-strip preparations from (Mytilus edulis L., Ostrea edulis L., Anodonta cygnea L.) (Pilgrim) 297
  — II. Isolated gill preparations from (Mytilus edulis L., Ostrea edulis L., Anodonta cygnea L.) (Pilgrim) 318

Ligia oceanica:
  See Isopod crustacean

Lipids:
  of sea-urchin semen (Cardin and Meara) 561

Locomotion:
  The forces exerted by the tube feet of the starfish during (Karkut) 575
  — Some aspects of the mechanics of mammalian (Barclay) 116

Locusta migratoria migratorioides:
  See Behaviour

Loss of water:
  See Eggs

Malpighian tubules:
  Active transport of potassium by the, of insects (Ramsay) 358

Mammalian locomotion:
  See Locomotion

Manx shearwater:
  Navigation in the (Matthews) 370

Marine invertebrates:
  See Ionic regulation

Mayfly nymphs:
  The diurnal rhythm of activity of (Harkness) 525

Mesogloea:
  See Coelenterates

Metabolism:
  of the black snake embryo. I. Nitrogen excretion (Clark) 492
  — II. Respiratory exchange (Clark) 502
  — The effect of washing on the motility and, of ram, bull and rabbit spermatozoa (White) 200

Mice:
  Central nervous function and changes in brain metabolite concentration. III. Glycogen in the normal behaviour of (Chance) 468

Microdissection:
  experiments on sea-urchin eggs at cleavage (Mitchison) 515

Molluscan contractile tissues:
  See Osmotic relations

Mosquito larvae:
  Exchanges of sodium and potassium in (Ramsay) 79

Motility:
  See Spermatozoa

Moulting fluid:
  of the Cecropia silkworm (Passonneau and Williams) 545

Muscle receptor organs:
  Physiological and pharmacological observations on, of the crayfish, Cambarus clarkii Girard (Wiersma, Furshpan and Florey) 136

Mytilus edulis:
  See Lamellibranchs

N

Navigation:
  See Manx shearwater and Pigeons

Nicotine:
  See Sea-urchin

Nitrogen excretion:
  See Black snake

Organizer tissue:
  The regional properties of amphibian, after disaggregation of its cells in alkali (Deuchar) 18

Orientation:
  See Pigeons

Orthoptera:
  On certain properties of the flight muscles of the (Ewer and Ripley) 170
  — See also Eggs

<td>Oxygen consumption: and cell size. A comparison of the rate of oxygen consumption of diploid and triploid prepupae of <em>Drosophila melanogaster</em> Meigen (Ellenby) 475</td>
</tr>
<tr>
<td><strong>P</strong></td>
</tr>
<tr>
<td>Pecten: Observations on certain mechanical properties of the ligament of (Trueman) 453</td>
</tr>
<tr>
<td>Phosphate: See Torpedo</td>
</tr>
<tr>
<td>Photometry: Simultaneous determination of sodium and potassium in small volumes of fluid by flame (Ramsay, Brown and Falloon) 1</td>
</tr>
<tr>
<td>Pigeons: Sun navigation in homing (Matthews) 243</td>
</tr>
<tr>
<td>— The orientation of untrained: a dichotomy in the homing process (Matthews) 268</td>
</tr>
<tr>
<td>Polarized light analysis: of the human red cell ghost (Mitchison) 397</td>
</tr>
<tr>
<td>Polarized light studies: See Cornea</td>
</tr>
<tr>
<td>Polyspermy: See Sea-urchin</td>
</tr>
<tr>
<td>Potassium: See Malpighian tubules, Mosquito larvae and Photometry</td>
</tr>
<tr>
<td>Potassium ions: and insect nerve muscle (Hoyle) 121</td>
</tr>
<tr>
<td>Prepupae: See Drosophila melanogaster</td>
</tr>
<tr>
<td><strong>R</strong></td>
</tr>
<tr>
<td>Rabbit: See Spermatozoa</td>
</tr>
<tr>
<td>Ram: See Spermatozoa</td>
</tr>
<tr>
<td>Regeneration: See Crustacea</td>
</tr>
<tr>
<td>Respiratory exchange: See Black Snake</td>
</tr>
<tr>
<td>Respiratory movements: See Caddis larvae</td>
</tr>
<tr>
<td>Sea-urchin: The fertilization reaction in the. The induction of polyspermy by nicotine (Rothschild) 57</td>
</tr>
<tr>
<td>Sea-urchin egg: The inorganic constituents of (Rothschild and Barnes) 534</td>
</tr>
<tr>
<td>Sea-urchin eggs: Cleavage of, in colchicine (Swann and Mitchison) 506</td>
</tr>
<tr>
<td>— Microdissection experiments on, at cleavage (Mitchison) 515</td>
</tr>
<tr>
<td>Sea-urchin semen: The lipids of (Cardin and Meara) 564</td>
</tr>
<tr>
<td>Silkworm: See Cecropia silkworm</td>
</tr>
<tr>
<td>Snake: See Black snake</td>
</tr>
<tr>
<td>Sodium: See Mosquito larvae and Photometry</td>
</tr>
<tr>
<td>Spermatozoa: Counting live and dead bull (Campbell, Hancock and Rothschild) 44</td>
</tr>
<tr>
<td>— of sterile bulls (Hancock) 50</td>
</tr>
<tr>
<td>— A new method of measuring the activity of (Rothschild) 178</td>
</tr>
<tr>
<td>— The effect of washing on the motility and metabolism of ram, bull and rabbit (White) 200</td>
</tr>
<tr>
<td>Starfish: The forces exerted by the tube feet of, during locomotion (Kerkut) 575</td>
</tr>
<tr>
<td>Temperature: of woodlice in the sun (Edney) 331</td>
</tr>
<tr>
<td>— See also Eggs</td>
</tr>
<tr>
<td>Torpedo: The release of phosphate from the electric organ of (Fatt and Woodin) 68</td>
</tr>
<tr>
<td>Tube feet: See Starfish</td>
</tr>
<tr>
<td><strong>U</strong></td>
</tr>
<tr>
<td>Uptake of water: See Eggs</td>
</tr>
<tr>
<td>Woodlice: The temperature of, in the sun (Edney) 331</td>
