THE MELVILLE TRUST
FELLOWSHIPS IN CANCER RESEARCH

The Trustees of the above Scheme invite applications for Fellowships in Cancer Research commencing in October 1957. The initial stipend will be according to experience, but will be not less than £300 per annum; and funds are available for the provision of equipment and for technical assistance. A Fellowship is normally awarded for a period of two years, but thereafter may be renewed, at the discretion of the Trustees.

The research is normally to be carried out in one of the recognized clinical or scientific departments in Edinburgh and, if possible, applicants should have made prior contact with the head of the appropriate department. If this is not possible, the Trustees will endeavour to make suitable arrangements.

The research may deal with any aspect of malignant disease, and candidates need not necessarily hold a medical qualification.

Applications together with the names of three referees, should be submitted by the 30th April, 1957, to the Honorary Secretary, Scientific Advisory Committee, The Melville Trust, Royal College of Surgeons, Nicolson Street, Edinburgh 8, from whom further particulars may be obtained. The Application should be accompanied by an outline of the proposed research, and by an account of any previous scientific or research experience.

The expenses incurred in travelling to the United Kingdom by any Research Fellow appointed from Overseas will be defrayed by the Trust, which will also reimburse all candidates who are requested to attend for interview.
