The Journal of Experimental Biology

Edited by
V. B. Wigglesworth and J. A. Ramsay

Contents

Burrows, M. and Horridge, G. A. The action of the eyecup muscles of the crab, 
Carcinus, during optokinetic movements ........................................ 223
Burrows, M. and Horridge, G. A. Motoneurone discharges to the eyecup muscles of the 
crab 
Carcinus ..................................................................................... 251
Horridge, G. A. and Burrows, M. Tonic and phasic systems in parallel in the eyecup 
responses of the crab 
Carcinus ..................................................................................... 269
Burrows, M. and Horridge, G. A. Eyecup withdrawal in the crab, 
Carcinus, and its interaction with the optokinetic response ................. 285
Horridge, G. A. and Burrows, M. The onset of the fast phase in the optokinetic response 
of the crab, 
Carcinus ..................................................................................... 299
Horridge, G. A. and Burrows, M. Efferent copy and voluntary eyecup movement in the 
crab, 
Carcinus ..................................................................................... 315
Fletcher, G. L. and Holmes, W. N. Observations on the intake of water and electrolytes by 
the duck (Anas platyrhynchos) maintained on fresh water and on hypertonic saline . 325
Usherwood, P. N. R. and Machli, P. Pharmacological properties of excitatory neuromuscular synapses in the locust ........................................... 341
Anderson, Margaret. Electrophysiological studies on initiation and reversal of the heart 
beat in 
Ciona intestinalis ........................................................................ 363
Mackie, G. O. Electrical activity in the hydroid 
Cordylophora .............................................................................. 387
Wells, M. J. and Young, J. Z. Changes in textural preferences in 
Octopus after lesions ..................................................................... 401
Young, J. Z. Reversal of a visual preference in 
Octopus after removal of the vertical lobe ........................................ 413
Runion, H. I. and Usherwood, P. N. R. Tarsal receptors and leg reflexes in the locust and 
grasshopper ................................................................................. 421
Lenfant, Claude and Johansen, Kjell. Respiration in the African lungfish 
Protopterus aethiopicus. I. Respiratory properties of blood and normal patterns of breathing and 
gas exchange ................................................................................ 437
Johansen, Kjell and Lenfant, Claude. Respiration in the African lungfish 
Protopterus aethiopicus. II. Control of breathing ................................. 453
Ellenby, C. Desiccation survival of the infective larva of 
Haemonchus contortus ................................................................... 469

Published for The Company of Biologists Limited

Cambridge University Press

Bentley House, 200 Euston Road, London, N.W.1

American Branch: 32 East 57th Street, New York, N.Y.10022

Price 30s. net (U.S.A. $5.00). Subscription per volume 80s. (U.S.A. $14.00)

Published bi-monthly. Second class postage paid at New York, N.Y.
