

A new series

SOCIETY FOR EXPERIMENTAL BIOLOGY SEMINAR SERIES

A series of multi-author volumes each of which aims to serve not only as a good introductory review of a specific topic but also to introduce the reader to experimental evidence to support the theories and principles discussed, and point the way to new research.

The first two volumes to be published

Effects of Air Pollutants on Plants

Edited by T. A. MANSFIELD

An investigation into the ways in which pollutants actually attack metabolic processes, or affect the plants' functioning at the physiological level

Forthcoming (August)

Hard covers £8.50 net

Paperback £3.80 net

Effects of Pollutants on Aquatic Organisms

Edited by A. P. M. LOCKWOOD

This volume describes experimental studies on the physiological and biochemical effects of a wide range of pollutants on aquatic organisms.

Forthcoming (September)

Hard covers £8.50 net

Paperback £3.80 net
